

Noise Reduction

Surround Sound

L Balance R

This panel contains three vertical sliders. The leftmost slider is labeled 'Noise Reduction' and is positioned at approximately 25%. The middle slider is labeled 'Surround Sound' and is positioned at approximately 75%. Below these is a horizontal 'Balance' slider, centered between 'L' and 'R'.

A circular equalizer interface with 12 frequency sliders arranged in a ring. The sliders are color-coded: 10 are green, 2 are red, and 1 is orange. A green rectangular indicator is positioned at the 4 o'clock position, pointing towards the center.

4:24

Play/Pause

Volume

This block shows media player controls. At the top is a progress bar with a time display of '4:24'. Below it are buttons for previous, play/pause, and next. At the bottom is a volume control slider and a speaker icon.

PR 32 64 200 500

0.0 0.0 0.0 0.0 0.0

A graphic equalizer with five vertical sliders. The sliders are labeled 'PR', '32', '64', '200', and '500' at the top. Each slider has a numerical scale from '0.0' at the bottom to a higher value at the top. The sliders are currently set at various levels, with the 'PR' slider being the highest.
